

## Facial Analysis Report

Prepared for  
**Client**

July 2, 2026

---

Landmark-based cephalometric assessment · MediaPipe geometry

# Disclaimer

Important information about this report

---

This AuraScan report is generated from computer vision analysis of facial photographs and landmark geometry. It is intended for educational and aesthetic guidance purposes only.

Results do not constitute medical diagnosis, dermatological assessment, or surgical recommendation. Individual variation in anatomy, lighting, and image quality may affect measurements.

Consult qualified healthcare or licensed aesthetic professionals before pursuing any treatment. AuraScan does not store or share your images beyond your local session unless you explicitly save history.

# Executive Summary

Overall assessment at a glance

---

**84** / 100

## Above Average

Your facial symmetry score of 97 indicates highly symmetric left-right proportions. Your composite score integrates symmetry, proportions, and feature harmony.

### Protocol Overview

A personalized protocol based on your facial analysis scores, targeting your specific areas for improvement while maintaining your natural strengths.

### Key Strengths

- Symmetry: 97/100
- Hair: 96/100

### Focus Areas

- Nose: 75/100
- Jaw & Chin: 78/100

# Overall Scores

Feature-level performance breakdown

## Core Metrics

|                  |       |
|------------------|-------|
| Harmony:         | 90    |
| Symmetry:        | 96.8% |
| Proportionality: | 93.9% |
| Visual Age:      | 24y   |

# Facial Measurements

Quantitative landmark-derived values

| Measurement          | Value    |
|----------------------|----------|
| Harmony Score        | 90/100   |
| Symmetry Index       | 96.8%    |
| Proportionality      | 93.9%    |
| Visual Age Estimate  | 24 years |
| Face Shape           | Round    |
| Width / Height Ratio | 1.13     |
| Upper Third          | 0.19     |
| Middle Third         | 0.54     |
| Lower Third          | 0.27     |
| Nasal W/L Ratio      | 1.43     |
| Philtrum / Lip Ratio | 613.07   |
| Dimorphism Index     | 57/100   |
| Averageness          | 40/100   |

# Landmark Mapping

478-point facial mesh overlay

---

Teal markers indicate sampled MediaPipe landmark positions used for ratio, symmetry, and proportion calculations.

# Feature Analysis

Selected structural assessments

---

## Symmetry

### 97/100 · Highly Symmetric

Your facial symmetry score of 97 indicates highly symmetric left-right proportions. Mild asymmetry in the periorbital and jaw regions is common and within normal variation.

## Proportions

### 84/100 · Well balanced

Vertical facial thirds — upper 0.19, middle 0.54, lower 0.27. Your proportionality score of 84 reflects well balanced distribution across facial height.

## Face Shape

### Round

Based on your facial landmark measurements, your face shape is classified as round with a width-to-height ratio of 1.13. This shape provides a soft foundation for hairstyle and styling recommendations.

## Skin Quality

### 82/100 · Good condition

Forehead brightness 126 · cheek redness index NaN · tone uniformity high. Under-eye region shows shadowed appearance. Skin tone is relatively even across regions.

# Improvement Protocol

Personalized recommendations

---

## 1. Facial muscle exercises

Regular jawline exercises can help define the lower face. Try chin lifts, jaw releases, and neck stretches for 10 minutes daily. Focus on resistance movements to strengthen the ...

HIGH · exercise

## 2. Skincare routine optimization

A consistent routine with SPF 30+ daily, retinol at night, and adequate hydration can significantly improve skin quality. Start with a gentle cleanser, followed by vitamin C ser...

HIGH · skincare

## 3. Makeup contouring techniques

Strategic contouring can enhance nasal proportions. Focus on highlighting the bridge and subtle shading on the sides. A matte bronzer 2 shades darker than your skin tone works b...

LOW · grooming

## 4. Daily sunscreen application

Apply SPF 30+ broad-spectrum sunscreen every morning, reapplying every 2 hours when outdoors. UV protection is the single most effective anti-aging measure. Choose a lightweight...

HIGH · skincare

## 5. Hydration & nutrition

Drink at least 2L of water daily. Omega-3 fatty acids (from fish or supplements), vitamin C, and antioxidants support skin health from within. Reduce processed sugar intake whic...

MEDIUM · nutrition

## 6. Quality sleep

Aim for 7-9 hours of quality sleep. Sleep deprivation accelerates skin aging, increases cortisol, and worsens under-eye appearance. Maintain a consistent sleep schedule and limi...

# Before & After Visualization

Projected improvement with consistent grooming & skincare

BEFORE

AFTER (PROJECTED)

- Before: your uploaded portrait as analyzed.
- After: canvas-enhanced visualization showing improved skin clarity, balanced lighting, and refined grooming — not a surgical simulation.
- Focus protocol areas: skincare consistency, sleep posture, jaw exercises, and SPF protection as outlined above.

# Closing Summary

## Next steps

---

Thank you for using AuraScan. Your overall score of 84/100 (Above Average) reflects a structured assessment of facial harmony, symmetry, and feature balance.

### Recommended next steps

- Follow the improvement protocol for 30 days before re-assessment.
- Maintain consistent lighting and front-facing photos for accurate tracking.
- Consult professionals for any clinical or dermatological concerns.
